MiCBT for Crisis-Intervention and Relapse Prevention

The aim of this 3-day introductory workshop in MiCBT is to introduce the integration of mindfulness training with core principles of Cognitive Behaviour Therapy to improve our way of addressing crisis and prevent relapse in a wide range of psychological disorders. It will describe the important theoretical framework underlying MiCBT and introduce participants to the use of these skills across a wide range of chronic and acute conditions.

This workshop will provide opportunities to practice mindfulness skills under the guidance of an experienced teacher and principle developer of MiCBT - Dr Bruno Cayoun.

The 3-day workshop is a comprehensive introduction to MiCBT and can be taken independently without proceeding further with the 8-week online Foundation course.

Mindfulness-integrated Cognitive Behaviour Therapy (MiCBT) is an evidence-based sophisticated integration of mindfulness core principles and traditional CBT. MiCBT consists of a four-stage model of treatment applicable for a wide range of conditions and ages.

It is based on the combination of traditional establishment of mindfulness in Theravada teachings (Burmese Vipassana tradition) with solid and well-established principles of cognitive and behavioural traditions in the West.
