Introduction

This intensive training program is especially designed to equip social workers, counselors, mental health professionals, health care personnel with comprehensive, essential and effective skills in working with people struggling with mental health challenges in the community. Participants will start from learning the use of Diagnostic Statistic Manual (DSM 5) & International Statistical Classification of Diseases (ICD 10), to the methodology and procedures in making accurate possible diagnosis of client's condition, formulation of effective case management for working with various mental disorders.

The program also offers a systematic approach that aims to enhance participants' clinical wisdom in conducting mental state examination, clinical interviews, case formulation and prioritizing intervention options as well as providing quality care in the community settings.

Course Objective

- To understand the classification of mental disorders, the signs and symptoms of different mental disorders and be able to make possible diagnosis.
- To equip participants with the skills in conducting mental state examination, clinical interview as an essential component in integrative clinical management

Course Content

1. Understanding the New DSM 5
2. Brief description of the relationship between DSM 5 and ICD 10
3. Basic concept of mental disorders and its classification
4. Methodology & procedures in conducting a systematic mental state examination (MSE) and clinical interview
5. How to collect clinical data needed for proper diagnosing of client's mental condition, symptom severity and level of psycho-social functioning
6. How proper assessment interview is essential to the development of appropriate care plan and selection of treatment strategies
